Special appreciation to Taiwo Olalere (Premier), Olawale Peter (Pietro's) and Abolude Bilqees Busayo (Billz_creation) for helping with authentic questions for this revised edition, may God bless you all.

Introduction

Over the years the number of candidates seeking admission into the University of Ilorin has been nothing short of mindboggling. Every Emeka, Abdulsalam, Olayinka and Joseph wants to get into the university known for its remarkable academic calendar and quality. Hence the competition is fierce and one has to stand out to be sure of getting that notification indicating one has been admitted into the “better by far” citadel of learning.

The University of Ilorin Post UTME is Computer Based Test and is more or less a form of aptitude test with basic knowledge tested. With English language having the bulk of the questions (about 80%) whereas Basic Arithmetic and General Knowledge (taking about 10% apiece) making up the remaining number of questions (50 questions all together)

This question and answer pack is aimed at getting one familiar with what to expect on that particular day. With the contentious answers of the most recent years explained in the simplest form possible to aid easy recall.

This question pack should in no way be a form of substitute for your personal preparation by reading recommended English text and other necessary material but a form of aid to get you acquainted with what to expect.

For instance, seeing spellings being asked should spur you to look up other possible easily misspelt words and to commit them to memory.

I wish you success in this examination as you go through this aid. God bless you.

Ohije O. Aide'

What to expect in the forthcoming Unilorin's post Utme examination ?

The University of Ilorin's post utme examination format over the years has been 50 questions to be attempted under about 25 – 30 minutes. And there is very little chance this particular format would be changed.

The examination is similar for every aspirant irrespective of intended course of study or jamb subject combinations as the University is satisfied with your passing and meeting the Unified Tertiary Matriculation Examination and O'level requirement respectively for your course of study.

The questions are grouped into three major categories which are Use of English, Basic Mathematics and General Knowledge (Current affairs).

Generally under Use of English the following are usually (**not exclusively**) tested;

1. Questions under Concord
2. Synonyms
3. Antonyms
4. Phrasal verbs
5. Statement interpretation
6. Stress (Both Emphatic and Word)
7. Oral English
8. Idioms
9. Intonations
10. Sentences

For Mathematics;

1. Probability
2. Series
3. Discount
4. Word problems
5. Percentage
6. Fractions etc.

While for General Knowledge

1. Basic history
2. Current happenings around you
3. Sports
4. Places (Countries, Capital cities, Currencies, Deserts etc.)
5. Notable individuals both nationally and internationally and their portfolios
6. Nigeria political history
7. Unilorin's history
8. Unilorin's principal officers and their portfolios etc.

Prior to now the ratio at which the **50 questions** were picked from the three aforementioned categories were subjected to sheer luck. However it seems in recent years the system has been programmed to set a particular number of questions from each categories. So Candidate A will get same proportion of questions in each categories as Candidate B though their questions may be quite different.

How do I get the best out of this question pack ?

The best way to get the most out of this question pack is to see it as **AN AID** and not as a question bank meant to be crammed with the intention of regurgitating the answers on that particular day as there are about thousands of questions in the University archive.

When going over the pack try as much as you can to do your basic research and know **WHY** answer to question 2 is option A and not Option B which looks more like the answer. And the way to go about this is by getting the **BEST** English, Mathematics and current affairs text/material available around and also by consultation of a good dictionary when necessary.

Study the questions in this question pack and any similar questions you can find under the above category because “**the more the merrier**” as you may just find yourself with similar questions on that very day and won’t waste time in answering such leaving you with ample time to face other questions.

N/B: The 80 questions (100 questions in 2018) per year in this question pack is more than the 50 you are to expect on the day of your post utme examination.

HOW TO EMERGE A TOP SCORER

Introduction:

Emerging a top scorer in the forthcoming post Utme will do you more good than harm with UNILORIN having the bulk of applicants year in, year out. With recent Jamb statistics indicating close to 2million candidates applying across all tertiary institutions in the country, it is expected to further increase with 100,000+ candidates fighting for 12,000+ few available spaces.

1. Raise the bar

The first step to scoring high is raising the bar of your expected post utme score. In a school like UNILORIN aiming for 50% is as dangerous as dangerous sounds and for some competitive courses like Medicine, Law and Pharmacy aiming for 70% can jeopardize your chances of getting admitted as more often than not such a candidate may fall short in attaining such scores and even if they do, theirs may be dwarfed by individuals scoring 90s and high 80s. The secret of top scorers is to aim for 100% in the PUTME examination (let them call you names and laugh at your target don't be moved) as it is better to aim for the stars (100%) so if you fall short you land on the moon (very high scores). Remember for you to lead an orchestra, you must learn to turn your back to the crowd (detractors, naysayers, destructive-critics)

2. Have a plan

A goal without a plan is a mere wish. A positive effect of aiming for 100% is that it sets your mind in motion in trying to attain such a score. It makes your reading more circumspect and effective as your aim is, to not, miss a single question on that day.

- a. How many hours do I need to read ?
 - b. Which books are essential to attain my goals ?
 - c. How many past questions should I treat everyday ?
- Etc.

Asking your self such important questions will give you an insight of the necessary academic arms and ammunition needed to annihilate this examination.

3. Get the right material

This material is one as it gives you an insight to the pattern of questions as well as the authentic questions of previous years.

Other notable materials that will be of help in this examination is/are (Note: Recommended, not compulsory)

1. Invisible Teacher -- Dele Ashade
2. A - Z use of English -- Dele Ashade
3. The English tablet -- Goodday Obhiose (The Gargantuan)
4. Fundamental formulas of English – Barr. Oscar Iyoha
5. Dictionary (for cross checking the oral aspect)
6. Jamb English past questions with authentic answers.
7. Any basic mathematics textbook should do.
8. Two/three authentic current affairs

Note: Not getting "authentic" past questions or current affairs text will be harmful and

unless you are very sensitive to errors and go the extra miles in researching some answers that raises your eyebrow you might be swallowing "toxic" information hook, line and sinker (completely)

4. Have short term goals

- I shall finish my textbook(s) in one week then keep on revising them till the exam day.
- I shall commit, over previously asked 1000+ Jamb use of English antonyms and synonyms (crosschecked answers), to memory.
- I shall face all my weaknesses (e.g orals, basic math, antonyms, current affairs) head on.
- I shall spend nothing less than X hours studying
- Add yours

5. Be consistent

Discipline and consistency is what differentiates a let-me-just-pass from the Top Scorer. So choose carefully.

6. Rest

A good sleep will make you alert for the next day's activities and increase optimal output. This is why it is important to start preparation for the post utme as soon as you can.

7. Don't forget the place of God.

This is actually the most important aspect, As Mr X can prepare extremely well and in the end experience ill-health, malfunctioning laptop or computer, a brain block or an extremely strange set of questions on that particular day any of

which will affect the candidate's performance.

My prayer and expectation is that you will succeed beyond expectations and become a good example of hard work and God's grace paying off.

5 : 4 : 3

For Patience's share;

$$= 5 / (5 + 4 + 3) \times 396$$

$$= (5/12) \times 396$$

$$= \text{#}165$$

63.

64. A

Explanation:

$$(1 - 5/10) \times X = 2.40$$

$$(5/10)X = 2.40$$

$$X = 2.40 \times 10/5$$

$$X = \text{#}4.80$$

65. B

Explanation:

$$X = (3400 \times 113) / 100$$

$$= \text{#}3,842$$

66. B

Explanation:

Total initial oranges = 25

No given to Ade = 10

No given to Bola = 5

No left = Total - Ade's - Bola's

Number left = 25 - 10 - 5

Number left = 10 Oranges

Therefore the fraction is 10/25

Which is further simplified to 2/5

67. C

Explanation:

By simply dividing 44 by 0.04 we will get the number of 0.04 in 44.

$$= 44 / 0.04$$

$$= 1100$$

68. C

Explanation

$$= 22 \div (1/2) - 4$$

$$= 22 \times (2/1) - 4$$

$$= (22 \times 2) - 4$$

$$= 44 - 4$$

$$= 40$$

69. C

Let A represent the present age of Ade

$$A - 5 = 8$$

$$A = 8 + 5$$

$$A = 13$$

In ten years time;

$$A(10) = 13 + 10$$

$$A(10) = 23 \text{ years}$$

79. C

80. D

Note A(10) represents Ade in 10 years' time.

70. C

Explanation:

The fastest way to get this without calculator is by finding the L.C.F. of the denominators

$$1/2, 1/6, 1/3, 1/5$$

$$\text{L.C.F.} = 30$$

Then multiply each of them by the 30

$$1/2 \times 30 = 15$$

$$1/6 \times 30 = 5$$

$$1/3 \times 30 = 10$$

$$1/5 \times 30 = 6$$

From the above we can deduce that 1/6 which is option C is the smallest with 1/2 being the largest.

Explanations

Discount of 6% of 180

$$= \frac{6}{100} \times 180$$

$$= 10.8$$

Therefore $180 - 10.8$

$$= \text{\#}169.20$$

15. B

Explanation:

$$\frac{216}{324}$$

Divide both the numerator and denominator by the smallest number possible that will give a whole number answer

So we divide by 2

$$(\frac{216}{2})/(\frac{324}{2}) = (108)/(162)$$

We can still divide by 2

$$(\frac{108}{2})/(\frac{162}{2}) = (54)/(81)$$

2 can't go here, so we switch to 3

$$(\frac{54}{3})/(\frac{81}{3}) = (18)/(27)$$

We can still divide by 3 but 9 would take us to the lowest terms so we use 9

$$(\frac{18}{9})/(\frac{27}{9}) = \frac{2}{3}$$

16. A

Explanation

Km ----- hours

Therefore

400 km ----- 18 hours

1600 km ----- X hours

Cross multiply

$$400 X = 18 \times 1600$$

$$X = \frac{(18 \times 1600)}{400}$$

$$X = 72 \text{ hours}$$

Note 24 hours make 1 day therefore

$$\frac{72}{24} = 3 \text{ days}$$

17. C

Explanation

47 ----- 94%

Y ----- 100%

$$Y = (100 \times 47) / 97$$

$$Y = \#50$$

18. A

Explanation

5/10 is the same as 1/2

$$1 - 1/2 = 1/2$$

$$1/2 \times X = 2.4$$

$$X = 2.4 \times 2$$

$$X = 4.8$$

19. D

Explanation

Sum of Arithmetic progression

$$S = (n/2) \times (2a + (n - 1) d)$$

n = nth term

a = 1st term

d = common difference

$$S = (9/2) \times (2 \times 1 + (9 - 1) \times 1)$$

$$S = 4.5 (2 + 8)$$

$$S = 4.5 (10)$$

$$S = 45$$

20. C

Explanation

$$20/100 \times Y = 60$$

Therefore

$$20Y = 60 \times 100$$

$$Y = (60 \times 100) / (20)$$

$$Y = 300$$

21. B

Explanation

When it has to do with siblings (brothers and sisters) half is apt for a non biological spouse of your biological parent step is used instead.

22. D

Explanation

Whale is a mammal though it is found in the sea alongside other Pisces (fishes).

23. B

Explanation

$$X/50 \times 100 = 60$$

Therefore

$$X = (60 \times 50) / 100$$

$$X = 6 \times 5$$

$$X = 30$$

24. C

Explanation

$$16 : 24$$

Divide through by 2

$$8 : 20$$

$$4 : 10$$

$$2 : 5$$

25. A

Explanation

120 ----- 100%

Y ----- 120%

$$Y = (120 \times 120)/(100)$$

$$Y = 144$$

26. A

Explanation

Remember 100 kobo makes one naira

15 kobo ----- 1 unit

42.55k ----- X ?

Converting #42.55k to Naira

$$42.55 \times 100$$

$$= 4255k$$

Therefore

15K ----- 1

4255K ----- X ?

$$15X = 4255$$

$$X = 4255/15$$

$$X = 283.67 \text{ unit}$$

48. C

49. B

Explanation

$$L = a + (n - 1) d$$

$$78 = 35 + (n - 1) 1$$

$$78 - 35 = n - 1$$

$$78 - 35 + 1 = n$$

$$n = 44 \text{ (first stretch of pages read)}$$

$$L = a + (n - 1) d$$

$$127 = 102 + (n - 1) 1$$

$$127 - 102 + 1 = n$$

$$n = 26 \text{ (second stretch of pages read)}$$

Total pages = 1st stretch + second stretch

$$T = 44 + 26$$

$$T = 70$$

50. B

58. B

59. C

60. B

Explanation

It is spelt ACCOMMODATION with double “C” and double “M”.

61. D

Explanation

$$5:3 = 8$$

We are going to divide through by 8, as we are dealing with humans we should have whole numbers for it to be the possible total number of students as we can't have fractioned students

$$= 32/8$$

$$= 4$$

So the above is possible and hence not our answer

$$= 40/8$$

$$= 5$$

This isn't our answer too

$$= 48/8$$

$$= 6$$

Same like the rest, not the answer

$$= 36/8$$

$$= 4.5$$

This is our answer as it couldn't have been the total number of students represented by the ratio 5:3

62. D

63. A

Explanation

It is spelt QUARRELLING with double “R” and double “L” whereas QUARREL has double “R” and a single “L”.

64. D

Explanation

Its is a possessive pronoun whereas it's is simply it is or it has depending on what follows it. So since we are talking about a possession of the bird, its is appropriate.

65. B

Explanation

Taking a careful look at the series we will find the added numbers being greater by one of the previously added number.

So,

$$0 + 1 = 1$$

$$1 + 2 = 3$$

$$3 + 3 = 6$$

$$6 + 4 = 10$$

$$10 + 5 = 15$$

$$15 + 6 = 21 \text{ which is our answer}$$

So what will be our next if the series had continue ? No, Not 26 but 28 as we will be adding 7.

Note:

A prime number is one that can only be divided by 1 and itself (1 is excluded)

An even number is a number which is evenly divisible by 2.

An odd number is any integer that can not be divided by 2 without giving a remainder (1 is included)

Now; to the question proper, the prime integer between 1 and 10 are ; 2, 3, 5, 7

Hence the sum between the highest and lowest is $2 + 7 = 9$

11.A

$$3^{(x - y)} = 27 \text{ -----}(1)$$

$$3^{(x + y)} = 243 \text{ -----}(2)$$

Therefore

$$3^{(x - y)} = 3^3 \text{ ----}(1)$$

$$3^{(x + y)} = 3^5 \text{ ----}(2)$$

Hence

$$X - y = 3$$

$$X + y = 5$$

(since we are interested in the value of x to eliminate Y we'll add both equations)

$$2x = 8$$

$$X = 8/2 = 4$$

The knowledge of fast and slow action is being tested here. A fast action is one which is carried out within a very little time frame, whereas a slow action is one that is carried out within a much larger time frame.

Example of fast actions are

Cross (cross the road), leap (leap over a fence), Slap (slap somebody's face) etc.

Example of slow actions are

Washing, Cooking, Singing etc.

Questions on this are usually started by;

I saw...

We saw... etc.

And the rule is, use a bare infinitive (a verb in its base form without “s”, “ed” or any other suffix) when an action is fast. Also as a rule, a slow action should be used only in

the present continuous form e.g. washing, cooking etc.
